

Hello,

I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. Some of this programming is not available elsewhere, especially weather information, when I am traveling out west in the middle of nowhere. Weather updates on XM Radio allow me to keep my family safe.

Thank you,

Sean
